ABOUT ME

AWS Certified Node.js Software Engineer with proven experience designing and developing scalable, multi-tenant backend architectures from scratch. I specialize in building high-availability systems, optimizing complex data workflows, and integrating AI capabilities like RAG into modern web applications. Adept at leveraging modern cloud infrastructure and event-driven patterns to deliver robust, maintainable solutions tailored to complex business domains.

WORK EXPERIENCE

IT-Dimension | 11/2023 - present

Backend Developer (Node.js)

- **NDA (e-commerce platofrm) –** e-commerce portal specializing in women's cosmetics.

  Tech stack: NestJS, Claude, Docker, PostgreSQL, Redis, RabbitMQ, AWS(SES, S3, ECS, EventBridge, Lambda), Grafana, Swagger.

  Responsibilities: Developed and maintained backend services for core business domains, including on-demand and scheduled 1C database synchronization, advanced catalog filtering, and complex promotional logic for testers and gifts. The agentic development workflow relied extensively on Claude Agents, governed by guardrails, skills, and conventions continuously managed via CLAUDE.md files.

- **SensOPT -** a web app for gathering and aggregating values from sensors (weather, agriculture, etc).

  Tech stack: NestJS, EC2, Kafka, AWS(EC2, SQS, Lambda), GitHub Actions, TimescaleDB.

  Responsibilities: helped design backend logic for new features, and developed a smooth integration for asynchronous data aggregation.

- **NDA (AI project) –** workforce management web portal.

  Tech stack: NestJS, PostgreSQL, Prisma, Redis, BullMQ, DigitalOcean, WebSockets, LangChain, Whapi, Pinecone, LangSmith, PostGIS, Alloy, Grafana, Docker, GitHub Actions, Sentry.

  Responsibilities: designed and developed the entire backend architecture from scratch for a multi-tenant system enabling company registration, employee management, contact information handling, and working schedule/shift planning with real-time updates and data manipulation. Built a robust and reliable architecture tailored to an error-prone domain, ensuring high availability and data consistency. Implemented an AI-powered employee assistant integrated with WhatsApp via Whapi, leveraging LangChain and ChatGPT for request handling, and Pinecone for document storage and retrieval-augmented generation (RAG). Set up monitoring, logging, and CI/CD pipelines to ensure observability and streamlined delivery.

- **NDA (Automated posting platform) –** an automated social media posting platform. Responsibilities: designed and developed the entire backend architecture from scratch for a multi-tenant system enabling company and workspace management, user invitations, and fine-grained role-based access control.

  Tech stack: NestJS, PostgreSQL, TypeORM, Redis, BullMQ, AWS, WebSockets, Late, Polotno, Docker, GitHub Actions, Sentry, Stripe.

  Responsibilities: designed and developed the entire backend architecture from scratch for a multi-tenant system enabling company and workspace management, user invitations, and fine-grained role-based access control. Implemented functionality for connecting social network accounts (e.g., Instagram, LinkedIn, Facebook, YouTube), creating and scheduling posts, calendar-based planning, and real-time content updates. Architected and implemented a scalable ABAC authorization system to manage roles and permissions across workspaces. Integrated Late for social account connections and automated publishing workflows. Established CI/CD pipelines, background job processing, and monitoring to ensure reliability and scalability.

SKILLS

- Node.js
- NestJS
- CLAUDE
- PostgreSQL
- Docker
- MySQL
- Redis
- Elasticsearch
- MongoDB
- Pinecone
- Stripe
- Nginx
- Prisma
- TypeORM
- RabbitMQ
- Kubernetes
- Kafka
- Microservices
- Linux
- gRPC
- GraphQL
- LangChain
- LangSmith
- BullMQ
- Websockets
- Late
- Firebase
- Sentry
- Google Cloud
- DigitalOcean
- CASL
- AWS
- Clerk

EDUCATION

Zaporizhzhia National University | 2019-2025

PhD Computer Science

- Database Theory
- Data Engineering
- ML
- Web Developement
- Cloud Technologies
- Discrete Math

LANGUAGES

English: Advanced

Ukrainian: Native

Russian: Native

CERTIFICATIONS

AWS Certified Cloud Practitioner 03/2024 - 03/2027
